EXPERIENCE (1+ YEAR)

React Developer
MasalaGames

📅 February 2022 – Present 📍 Ahmedabad

COMPANY PROJECTS

Frontend Developer
alive.house

📅 February 2022 – December 2022

In this project, artists were allowed to launch songs and auction off NFTs for users to bid on. A user can collect NFTs and sell them in the metaverse.

- An external project for a company named Alive.house.
- Designing User Interfaces was my responsibility.
- I was responsible for fixing bugs and adding new features.
- In charge of the app's performance.
- Responsible for user authentication via Metamask and Magic auth.
- Integrate Unity engine with React to provide a meta-world experience for users.
- The Responsibilty is to integrate Blockchain into React so that users can collect NFTs.
- Responsible for all the API integration in frontend.
- Responsible for project deployment in different stages.
- Responsible for retrieving user-collected NFTs from Opensea.

  TECHNOLOGIES - *ReactJs , TailwindCss , HookState/core , Axios , EthersJs , Strapi , React-router-dom*

MasalaGames

📅 December 2022 – February 2023

- It's my own company's website.
- The entire user interface and functions are developed by myself.
- Fully grid-based user interface to showcase corporate projects.
- Responsible for integrating ThreeJs with React.

  TECHNOLOGIES - *ReactTS , TailwindCss , Axios , Redux/toolkit*

PERSONAL PROJECT

Youtube Clone

YouTube's homepage and video player page with important features were on this project.

- Youtube Developers API is used to fetch similar data result as youtube.
- Debouncing is used to minimizes the number of times the search results fetching API is fired.
- Infinity Scrolling.
- Caching all search results in Redux to reduce search API calls even further.
- A Lazy-Loading strategy is used to minimize bundle size for maximum performance.
- API Polling used for Live-Chats.
- Reddit-style nested comments are used.
- Simmer Loader is used for better user-experience.
- Jest is used for unit-testing.

  TECHNOLOGIES - *ReactTs , TailwindCss , Redux/toolkit , react-router-dom , Jest*
